

**SIEGENIA** Innovations for you:

# DRIVE axxent HSA smart

## Our benefits<sup>3</sup>:

- ❶ Move sash weights up to 400 kg at the press of a button
- ❷ Attractive appearance due to concealed lift drive
- ❸ SIEGENIA Comfort App operation for smartphone and tablet as standard

## Ease of use and stylish design.

SIEGENIA door systems give modern sliding doors a perfect design and guarantee particularly simple and safe operation — even via an app: the fully automatic DRIVE axxent HSA smart lift-slide drive automatically opens and closes lift-slide doors up to a sash weight of 400 kg. With a concealed design, the lift drive ensures reliable locking and unlocking of extremely large windows and, along with the stainless steel button on the sliding sash, creates a highly attractive appearance.

The sash can be operated either via this stainless steel button or conveniently via a smartphone or tablet with the SIEGENIA Comfort App, which comes as standard. An optional infrared remote control is also available. The motorised control of the night vent and timer function for 10-minute ventilation is particularly convenient: the opened sliding door closes automatically after 10 minutes.

In combination with a flat floor threshold, a barrier-free version as per DIN 18040 is also possible. Assembly is almost as easy as in the case of the familiar MHS400 slide drive.

Up to 400 kg  
can be controlled  
barrier-free at  
the touch of a button.

### Benefits for fabricators

- Suitable for a sash weight up to 400 kg
- Simple installation of the slide drive independent of hardware
- Suitable for lift-slide systems of all frame materials
- Automatic programming, night vent secured with locking bolts, programmable opening width, timer facility
- Rapid installation: drive pre-installed; plug & play system ready for connection
- Operable by wheelchair users and conformant with DIN 18040 if used in conjunction with the flat threshold

### Benefits for end users

- Modern, unobtrusive design due to its concealed lift drive and flat stainless steel operating button
- Slides and locks up to 400 kg at the press of a button
- Motorised night vent, timer function for 10-minute ventilation
- Option of a limited opening width
- Operable with SIEGENIA Comfort App as standard via a smartphone or tablet, status monitoring inside the building
- Electronic anti-trap protection feature conforming to relevant standards
- Operable by wheelchair users and conformant with DIN 18040 if used in conjunction with the flat threshold
